

What Customers Want

Many companies have excellent service records and competitive prices—the gap between sales success and failure is often as narrow as providing a special service that a customer wants. Web access to advanced project management tools has confirmed sales for many companies. Not only is this service impressive and attractive for sales, but it saves your staff and customers time and money through the ability to:

- ◆ Enhance communication between members of the project team;
- ◆ Access, view, and download all project drawings, specs, or other files from anywhere in the world where there is an Internet connection;
- ◆ And reduce the number of printed plans and drawings.

The Challenge to Satisfy Customers

Our market research indicates that few small- and medium-sized businesses currently have all of the resources that are necessary to offer the advanced services listed above. The requirements include, but are not limited to, appropriately trained personnel, a sufficient Web server, and the ability to handle a wide array of CAD file formats. So, while it is a daunting challenge to try to compete and satisfy clients without these advanced services, the cost to provide them is often too much to take on alone.

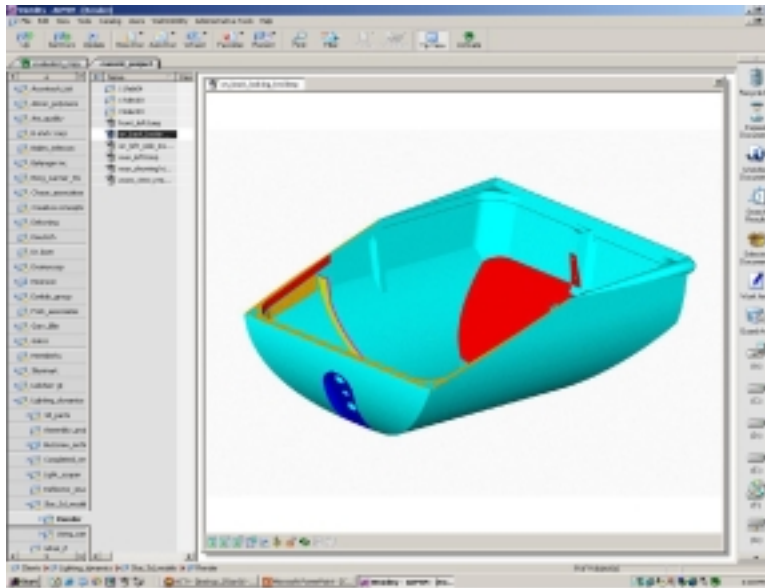

**Become eBusiness compatible
from RFQ to final product**

Solution: CADAnywhere

CADAnywhere makes these sales-confirming services affordable for small- and medium-sized businesses. CADAnywhere is an easy-to-use service that your clients will perceive as an invisible but potent branch of your business, and that you will see as a valuable and friendly member of your staff. With CADAnywhere on your team, you will be able to compete in any city or country, and you can use all of the same collaborative project management and professional services that the large companies use—at a fraction of their cost.

Unique Solutions and Support Services

- √ **Project Collaboration applications** – 24/7 secure access to project status and documents for you and your clients; efficient management of project communications; drawings, spec files, any documents; enhanced team productivity, accountability, and ownership; succinct audit trails for project history and risk management; new business development
- √ **Engineering Services** – design, manufacturing, product development, controls and automation for machine tools and component testing
- √ **CAD Software Support** - both on- and off-site
- √ **CAD Format Translation**
- √ **Computer Systems and CAD Administration** – systems acquisition, installation, and maintenance

An example of the Wintility[®] application showing the familiar file tree structure of most PC operating systems. Regardless of the files that you wish to share, Wintility can facilitate a secure exchange of any type of electronic file from anywhere that you need to be via the Internet. Rather than “copy” a file and place it on an Internet server, Wintility uses your own IT infrastructure to access the desired file.

Let us show you how CADAnywhere, LLC can help you gain new sales and realize cost savings through increased efficiency.
